Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

docket@nutter.com

Office Action Summary

Application No.

10/708,467

Applicant(s)

WENSTROM ET AL.

Examiner

Mary Hoffman

Art Unit

3733

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 October 2007.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3 and 5-18 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3, 5-18 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 08/10/2007 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____.

DETAILED ACTION

Claim Objections

Claims 1-18 objected to because of the following informalities: Applicant's use of the term "distally extending" in claim 1 is not clear to the examiner. The term --radially extending-- more clearly claims the direction of extension of the cutting element of the invention. Applicant should clarify in the Remarks what is meant by the term "distally extending" or amend the claims to recite --radially extending--. Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 and 5-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ruppert (US 571,400) in view of Scholl (U.S. Patent No. 6,110,175).

Ruppert discloses a tunnel notcher comprising an elongate member (FIGS. 1-2) with proximal (top end) and distal (bottom end) ends, and a cutting element (ref. #3) disposed proximal to the distal end of the elongate member and capable of removing bone within an opening of a bone tunnel, the cutting element being substantially wedge-

shaped and extending distally outward from the elongate member. A distal portion (see FIG. 1 at ref. #2) of the distal end of the elongate member is substantially tapered. The cutting element is disposed proximal to the substantially tapered distal portion of the elongate member. The cutting element includes a distal-facing surface that is disposed at an acute angle with respect to a longitudinal axis of the elongate member. The distal-facing surface is substantially concave. The angle between the cutting element and the longitudinal axis of the elongate member is less than 90° . The angle is in the range of about 20° to 70° . The cutting element includes a base portion coupled to the elongate member and a cutting edge positioned a distance apart from the elongate member. The cutting edge is positioned distal to the base portion. The cutting edge that is positioned a distance apart from the elongate member has a length that is less than a diameter of the elongate member. The cutting element is capable of creating a notch in bone having a substantially semi-circular shape.

Ruppert discloses the claimed invention except for (1) an inner lumen extending therebetween, the inner lumen being adapted to receive a guidewire (claim 1); (2) a handle extending in a direction transverse to a longitudinal axis of the elongate member disposed on a proximal portion of the elongate member (claims 14-15); and (3) a plurality of indicia formed on a distal portion of the elongate member and adapted to indicate a depth of the elongate member within a bone tunnel (claim 13).

Scholl discloses (1) an inner lumen extending therebetween, the inner lumen being adapted to receive a guidewire, (2) and a handle extending in a direction transverse to a longitudinal axis of the elongate member disposed on a proximal portion

of the elongate member, and (3) a plurality of indicia formed on a distal portion of the elongate member and adapted to indicate a depth of the elongate member within a bone tunnel, to provide a chisel for removing bone that can assess impaction into the bone and can be used with a guide wire.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to construct the device of Ruppert with an inner lumen extending therebetween, the inner lumen being adapted to receive a guidewire, (2) and a handle extending in a direction transverse to a longitudinal axis of the elongate member disposed on a proximal portion of the elongate member, and (3) a plurality of indicia formed on a distal portion of the elongate member and adapted to indicate a depth of the elongate member within a bone tunnel in view of Scholl to provide a chisel for removing bone that can assess impaction into the bone and can be used with a guide wire.

Claims 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ruppert (US 571,400) in view of Scholl (U.S. Patent No. 6,110,175) further in view of Boucher et al. (US 5,658,289).

Ruppert and Scholl disclose the claimed invention except for and (4) a locking mechanism comprising a threaded member disposed within a threaded bore formed in a handle, the threaded bore being in communication with the inner lumen of the elongate member is formed on the handle mated to the proximal end of the elongate member (claims 16-18).

Boucher et al. discloses a locking mechanism comprising a threaded member (ref. 30) disposed within a threaded bore formed in a handle extending in a direction transverse to a longitudinal axis of the elongate member disposed on a proximal portion of the elongate member, the threaded bore being in communication with the inner lumen of the elongate member is formed on the handle mated to the proximal end of the elongate member to secure the guide wire.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to construct the device of Ruppert and Scholl with a threaded member disposed within a threaded bore formed in a handle, the threaded bore being in communication with the inner lumen of the elongate member is formed on the handle mated to the proximal end of the elongate member in view of Boucher et al. to secure the guide wire.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mary Hoffman whose telephone number is 571-272-5566. The examiner can normally be reached on Monday-Friday 9:00-5:00pm.

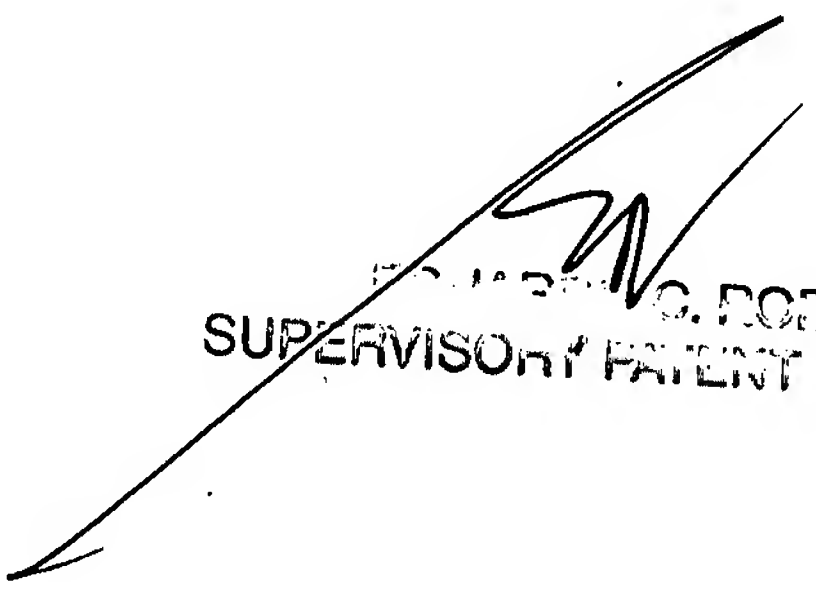

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eduardo C. Robert can be reached on 571-272-4719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
